Reply of Government.—Individual cases of hardship may be brought to notice.

Subject No. 357

Construction of dam across Kanva river.

Mr. Ranga Iyengar.

Summary of Representation.—Only a short distance separates the Malur and Closepet rivers near Kutagal. The tank to be constructed there should be fed by diverting the Colsepet river water to this tank. This will be highly profitable to Government and raiyats.

Reply of Government.—The project is being completed and will be considered after completion.

Subject No. 358.

Constructing a tank across the Vrishabhavati river.

Mr. Narasimha Chetti.

Summary of Representation.—It is requested that the project for the construction of a dam across the Vrishabhavati river during its course into Byramangala hobli may be sanctioned early as it would profit both Government and the raiyat population.

Reply of Government.—Under consideration in the Public Works Department.

Subject No. 359.

Repairing the Bolappenhalli and Devankere tanks.

Mr. Narasimha Chetti.

Summary of Representation.—The repair of these two tanks already inspected and surveyed by the Public Works Department may be expedited.

Reply of Government.—Noted.

Subject No. 360.

Construction of quarters for Closepet Taluk kasaba officials.

Mr. Malik Rahiman Saheb.

Summary of Representation.—It is requested that houses may be constructed at Government cost and lent to officials on rent, which will be beneficial both to officials and Government.

Reply of Government.—Cannot be done.

Subject No. 361.

Establishment of an Anglo Vernacular School at Closepet.

Mr. Malik Rahiman Saheb.

Summary of Representation.—Sanction to open a Government Anglo-Vernacular School, as there are many students in the town, is prayed for.

Reply of Government.—There is an aided Mission English School in Closepet which is in a fairly satisfactory state. Another English School is not required.

Subject No. 362.

Water-supply to Closepet.

Mr. Malik Rahiman Saheb.

Summary of Representation.—According to the present arrangement, only the reservoirs near the river receive sufficient supply of water, while those in the other parts receive no supply, such as Dodpet and others. This grievance was brought to the notice of the Deputy Commissioner when he visited Closepet, who promised to look to it early. The revision of mohatarfa in the town to enable the Municipality to obtain a loan from Government for the extension of water pipes to the higher parts of the town is necessary, as there want of water is much felt.

Reply of Government.—This is engaging the attention of the Deputy Commissioner and the Public Works Department.
